

Three box plots are displayed, representing the distribution of 'number' for three categories: 'none', 'small', and 'big'. The y-axis represents the 'number' values, ranging from 0 to 30. A dashed horizontal line is drawn at y=10.

- none:** The median is approximately 10. The interquartile range (IQR) is from approximately 5 to 15. The whiskers extend from approximately 0 to 20. There are two outliers at approximately 25 and 30.
- small:** The median is approximately 10. The IQR is from approximately 5 to 15. The whiskers extend from approximately 0 to 15. There are two outliers at approximately 20 and 25.
- big:** The median is approximately 15. The IQR is from approximately 10 to 20. The whiskers extend from approximately 10 to 20. There are two outliers at approximately 25 and 30.
